PROFILE

Full-Stack .NET Developer | Crafting Scalable APIs, Real-Time Microservices & Intelligent Automation Solutions

EDUCATION

Vellore Institute Of Technology

Vellore, India

Bachelor of Engineering in Computer Science And Engineering

2019 – 2023

SKILLS

Technical: C#, C++, Java, Python, JavaScript, TypeScript, SQL, .NET Core, MVC, AngularJS, HTML, CSS, MS SQL Server, OOPS, DSA, Microservices, Entity Framework, High Level Design (HLD), Low Level Design (LLD), APIs, Problem Solving.

Tools: JIRA, GIT, VS Code, Visual Studio, ChatGPT

EXPERIENCE

Arcon Tech Solutions

Mumbai, India

Full Stack developer

20-01-23 – Present

- Designed and developed over 100 RESTful APIs using **.NET Core** and **C#**, following **SOLID** principles and **design patterns (including Singleton and Builder)** to ensure maintainability and performance.
- Enhanced performance by 50% by optimizing **SQL** queries, implementing pagination and caching strategies, and resolving bottlenecks in data processing.
- Built scalable front-end components using **Angular** and **TypeScript**, improving user experience and application responsiveness.
- Designed and implemented **SignalR** in **Microservices** for real-time file download processing and **Quartz.NET** for background automation.
- Collaborated with cross-functional teams in Agile sprints; actively participated in sprint planning, reviews, and retrospectives.
- Identified and resolved SQL injection vulnerabilities, and automated SQL deployment scripts to support the CI/CD pipeline, reducing release time by 50% and improving overall deployment reliability.
- Worked on **MVC, Web API, and Entity Framework** architecture to deliver robust backend services aligned with business needs.
- Automated structured data extraction from PDFs using **Python**, reducing manual effort by 60% and increasing data accuracy.

PROJECTS

Travel Collab System

Link : <https://github.com/riijurdj/Travel-Collab>

- Created a collaborative travel platform for finding travel partners, including search functionality and group creation with detailed descriptions.
- Technologies used : ReactJS, NodeJS, MongoDB (MERN STACK)

Ecommerce Website

Link : <https://github.com/riijurdj/FirstEcommAngwebsite>

- Developed an eCommerce website with login/signup functionality, form validation dynamic data loading, cart display and product management features for sellers.
- Technologies used : AngularJS, Typescript
